

Services and support

Separation and heat transfer

At OSSO we pride ourselves on our first-class service and deliver, ensuring we are always on hand for an event planned or otherwise.

With more than 50 years' experience as a service and support provider we have been helping clients improve operations across multiple industries. Our in-house team of technical engineers are highly skilled and fully focused on service delivery and quality.

We help mitigate the risk of unplanned and costly stoppages with a proactive maintenance service plan. Clients benefit from a scheduled and planned approach, conducted on a regular basis ensuring equipment is thoroughly inspected, serviced, and maintained to the highest of standards at a time that suits.
