

## Gaparator Range - Compacting Rotary Screw (CRS)

The Gaparator Compacting Rotary Screw (CRS) utilises a precision rotating screw system, conveying solids through a highly efficient wedge wire filter chamber. This range of equipment compacts and reduces the volume of solid material for ease of transportation and the reduction in waste disposal costs.

Tonnage capacity and discharge length requirements can be designed to suit individual applications.

On-site demonstration facilities are available for the entire **Gaparator** range with interchangeable screen elements in a variety of slot gaps to determine the ideal separation.

### DIMENSIONAL DATA (mm)

MODEL	LENGTH	WIDTH	CAPACITY	Kw
CRS 150	1625	430	1.5m <sup>3</sup> /hour	0.75
CRS 250	2250	580	2.5m <sup>3</sup> /hour	1.5
CRS	4000	690	7.5m <sup>3</sup> /hour	5.5
