

DUPLEX FILTERS

Valve controlled, permitting continuous flow during filter element cleaning or changeover.

Complete with vent and drain valves, and connections for fitting differential pressure gauges to warn of blockage or reduced flow due to solids collection.

DUPLEX CARTRIDGE

Carbon steel, 15 bar rated.

Single pleated woven wire mesh element

This model can be fitted with a range of single or multiple elements.

connections can be any type or size to suit the application.

DUPLEX DOUBLE LENGTH BAG FILTER TROLLEY MOUNTED

Fitted with butterfly valves allowing both filters to run simultaneously.

Either side can be isolated to allow bag changeover causing only a brief interruption to double flow.

Wide range of filter bags in felt or polymer meshes, woven metal mesh or perforated strainer baskets.

Available in carbon or stainless steels.

Connections to suit the application.

Valve types, seal and media materials to suit your process.
